

SkillSwap

Skill Exchange & Learning Platform

A full-stack web application where users can share skills, request exchanges, attend learning sessions, chat, and review each other.

Objectives & Core Modules

What the platform will enable users and admins to do

1. User Authentication
2. Exchange Request
3. Skill Management
4. Learning Session
5. Skill Search
6. Rating & Review

Modules

Authentication

Admin Dashboard

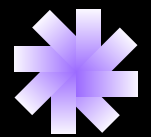

Technology Stack & Database

A clean three-layer full-stack architecture

React.js serves as the client-side presentation layer, JavaScript manages the backend application logic, and MySQL provides structured data persistence.

Core Database Tables

Users: Your digital ID card.

LearningSessions: Your scheduled class times.

Skills: What you can teach or learn.

Messages: Your private chats

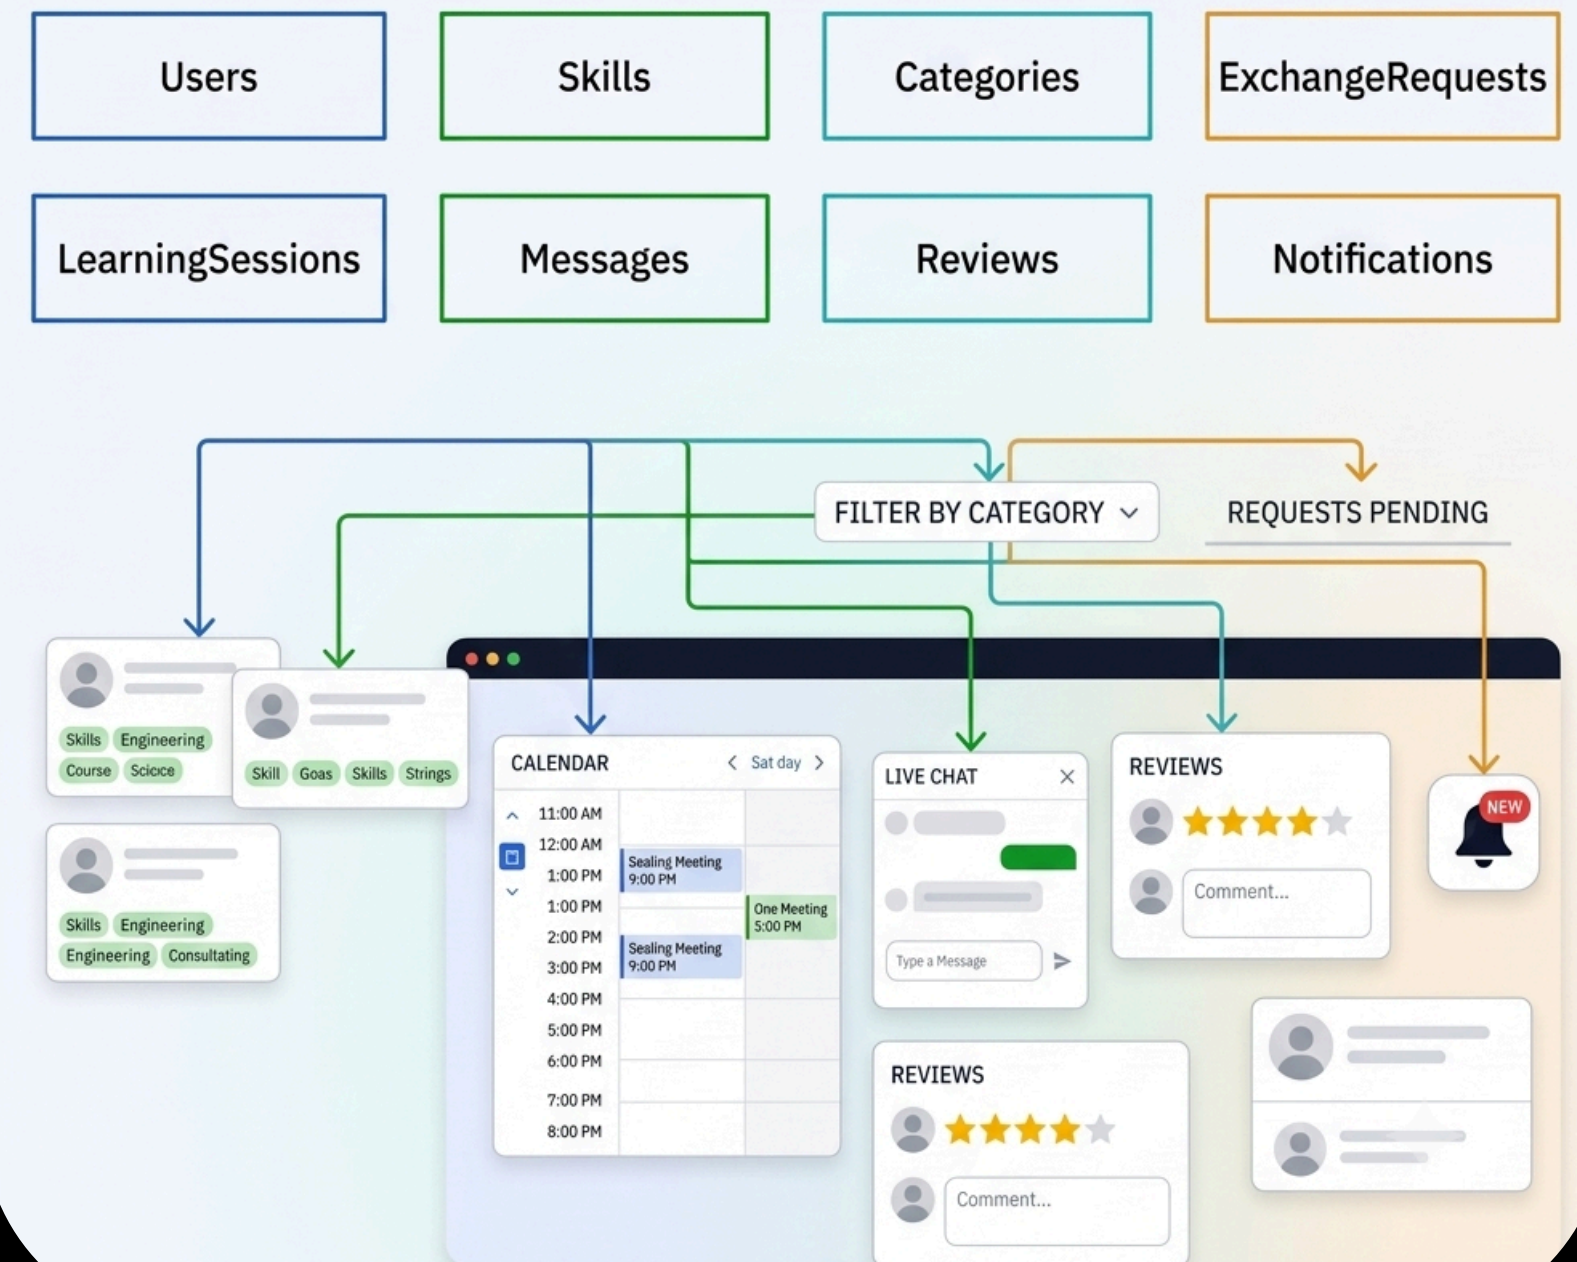

Categories: Folders to organize the skills

Reviews: Your star ratings and feedback.

ExchangeRequests: Your swap proposals ("Will you trade with me?")

Notifications: Your phone's alert pop-ups

CORE DATABASE TABLES: FROM DATA TO FUNCTIONALITY.

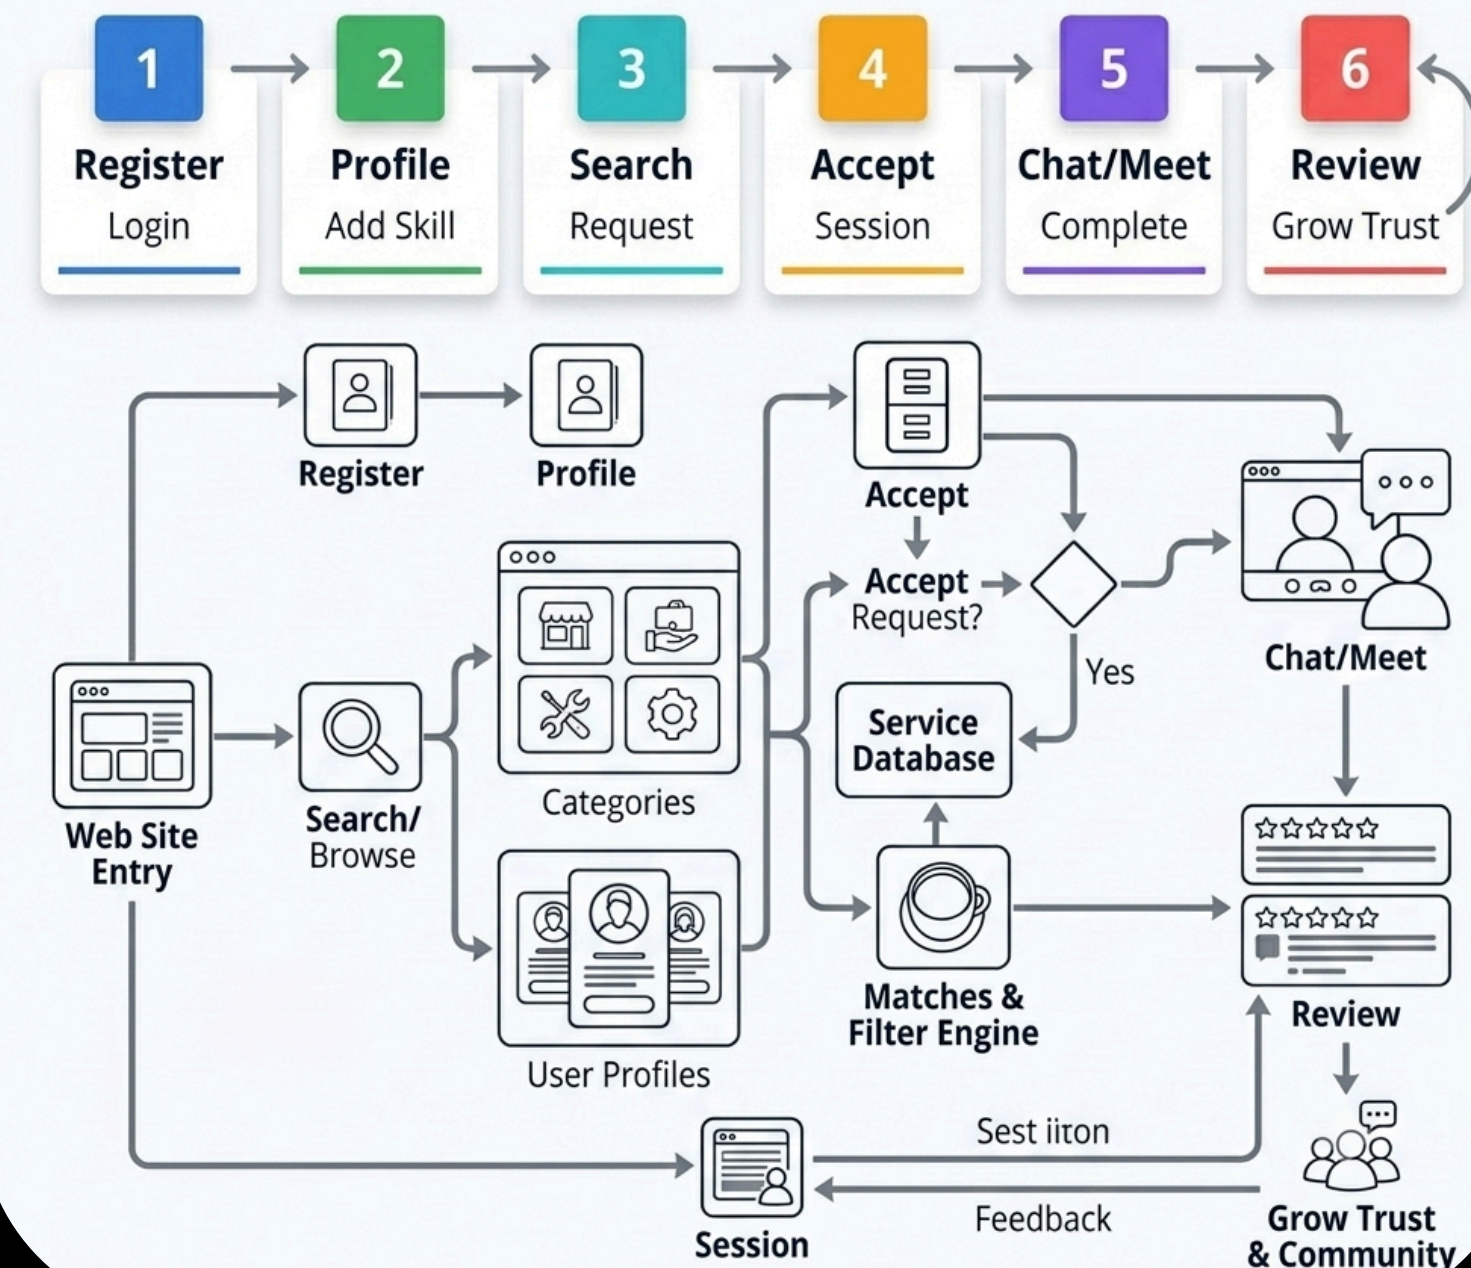

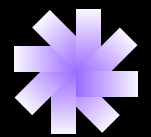

Workflow & Bonus Features

End-to-end path from registration to review

- **Register:** Users sign up and log into their accounts.
- **Profile:** Users list the skills they can teach and those they want to learn.
- **Search:** Users search or browse profiles by category and send swap requests.
- **Accept:** Once a request is accepted, a learning session is created.
- **Chat/Meet:** Users message each other to plan and then hold their learning session.
- **Review:** Users rate their experience to build community trust

INTEGRATED WEB SERVICE AND EXCHANGE SYSTEM FLOW

Bonus Features

- **Dark Mode:** Dark screen.
- **Email Notification:** Email alerts.
- **Dashboard Charts:** Progress pictures.
- **PDF Export:** Save files.
- **Portfolio Upload:** Show work.
- **Achievement Badge:** Get awards.
- **Responsive UI:** Phone + PC.

Conclusion

A complete platform for peer-to-peer learning and skill exchange.
